Mandate Overview

Start Date	Jan 01, 2012
Asset Category	Mixed
Risk Profile	Growth
1 Year Turnover	75%

Mandate Description

The objective of the Wolf on Bay Street Growth mandate is to achieve above average risk-adjusted returns over market cycles. The asset mix is composed primarily of equity (80%) and high-yield fixed income (20%). With an overall focus on capital preservation, the mandate manages risk first and capital growth second. An agnostic approach to both asset allocation and security selection drives the investment strategy, and allows the manager to identify and benefit from emerging themes in the global equity, fixed income and currency markets. The Wolf on Bay Street Growth mandate is suitable for assets with a longer-term time horizon, generally greater than 10 years, and higher volatility must be acceptable for the potential longer-term capital gains. The portfolio invests in stocks, bonds, cash, ETFs, mutual funds and some alternative securities, allows for a go-anywhere approach. The long-term objective of the strategy is to achieve a 9% annualized return over a full market cycle.
