Mandate Overview

Start Date	Jan 01, 2012
Asset Category	Mixed
Risk Profile	Conservative
1 Year Turnover	39%

Mandate Description

The objective of the Wolf on Bay Street Conservative mandate is to achieve modest returns over market cycles. The asset mix is tilted towards fixed income (70%) with some equity for growth (25%) and a cash weight of 5%. With an overall focus on capital preservation, the mandate manages risk first and moderate capital growth second. An agnostic approach to both asset allocation and security selection drives the investment strategy, and allows the manager to identify and benefit from emerging themes in the global equity, fixed income and currency markets. The Wolf on Bay Street Conservative mandate is suitable for assets with a shorter-term time horizon of three to five years. Some volatility must be acceptable for the potential for gains in excess of GICs or five-year government bonds. The portfolio will invest in stocks, bonds, cash, ETFs and mutual funds. The mandate allows for a go-anywhere approach but will focus primarily on Canadian assets (80%). The long-term return objective of the strategy is to achieve a 5% annualized return over a full market cycle.
